

# EVOLUTIONARY ENLIGHTENMENT AND MORE

An interactive exploration about human survival into the future.

As Jonas Salk said:

*I now see that the major shift in human evolution is from behaving like an animal struggling to survive to behaving like an animal choosing to evolve. In fact, in order to survive, man HAS to evolve. And to evolve, we need to find a new kind of thinking and a new kind of behavior, a new ethic and a new morality. It will be that of the evolution of everyone rather than the survival of the fittest. ... If we can be courageous one more time than we are fearful, trusting one more time than we are anxious, cooperative one more time than we are competitive, forgiving one more time than we are vindictive, loving one more time than we are hateful, we will have moved closer to the next breakthrough in our evolution.*
